SUPPLY & CUT LIST PLUS STEP-BY-STEP

Instruction

Home Sign

Supply list:

- 2 cedar planks 1x4x6
- Wood glue
- Miter saw
- Stain
- White & navy blue craft paint
- Boxwood greenery
- H,M, & E wood or mdf letters
- Drawer pull hardware x2
- Drill with drill bit
- Paintbrush or rag
- Sander
- 80 grit sandpaper
- Hot glue
- Hot glue gun
- Clamps
- Gloves, eye & ear protection, mask, & pencil

Cut list:

2-1x4x6 @ 30.5"

Step 1:

Cut the planks to size.

Step 2:

Glue the planks together with wood glue. I attached temporary clamps to the back so I could stain the wood before the glue dried.

Home Sign

Step 3:

Apply the stain to the wood.

Step 4:

Paint the H, M, and E MDF letters. I started with a base coat of navy blue. I allowed this to dry for about an hour and then added another coat of white on top. This was able to give the letters a distressed look.

Allow the letters and wood to dry overnight.

Home Sign

Step 5:

Now that everything is dry, it's time to attach the H, M, & E to the wood. I allowed about 1.5" in between each letter for spacing.

I allowed about 5" for the O

Home Sign

Step 6:

Attach the boxwood greenery to the wood. I purchased a boxwood garland and used wire cutters to cut off the branches and then used hot glue to attach the greenery to the wood.

Home Sign

Step 7:

Attach the drawer pulls to each side by first drilling holes where the screws will be so you don't split the wood. Then your sign is ready to display for everyone to see!
