

Pumpkin Spiced Soap

Supplies you'll need:

- 1/2 block of (2 lb) melt and pour shea butter soap (suspension formula)
- 3-4 drops Vitamin E oil
- 2 tablespoons pumpkin pie spice powder or essential oils
- Soap colorant (I used red and yellow)

Directions:

- Cut the shea butter soap base in half. Place one of the halves back in the container. You can use the extra for another batch of this recipe or another.
- Continue to cut the "squares" that are already scored into the soap and place in a medium microwave safe bowl. (I used a large Pyrex measuring cup). Cutting the soap into cubes will help with melting time.
- Microwave until completely melted (around 30 seconds, depending on microwave wattage). Remove from microwave and stir. **Do not over do this. I did 30 seconds then checked and stirred with a wooden skewer.
- Add 3 drops of red soap colorant and 6 drops of yellow soap colorant and stir. If you want a darker orange soap, add more red colorant. Stir well to distribute the color.
- Add the vitamin E oil and pumpkin pie spice and stir to incorporate. (You want to make sure that your soap base is a suspension formula. This will allow the pumpkin pie spice to be distributed throughout each soap bar instead of accumulating at the bottom).
- Pour the soap evenly into your molds and allow to harden at room temperature for at least 2 hours. (Or you can chill for 1 hour to speed up the cooling process).
- Once hardened, gently pop out each soap bar from the molds and ENJOY!!
